

524SH

For the interconnection between sterile and no-sterile routes (dirty/clean).

Built entirely of stainless steel AISI 304 (1.4301) satin-sheet, thickness 10/10, appropriately ribbed and reinforced against the mechanical stress-resistant. And equipped with double hinged doors on both sides allowing the interconnection between sterile and not-sterile routes.

They can be opened both by electronic lock with intermodal block equipped and also with "go light" illuminating automatically which inhibit the contemporary opening on both sides.

Box doors in double-sandwich sheet with a double layer of shatterproof glass, surrounded by an interchangeable silicon rubber profile integrated in the structure. These include opening handles made of stainless steel AISI 304 (1.4301). Complete with perimetric plugging closure panel work on both sides.

With 4 height-adjustable steel shelves.
