

## 191AX2S

Suitable for packaging and preparation of wire trays and containers used to contain the surgical instruments to be sterilized.

Built of a frame made of 35 x 35 mm square section bars and AISI 304 (1.4301) stainless steel sheet with Scotch-Brite surface finish.

Upper surface made of completely smooth and flat sheet metal, with rounded corners, supported underneath by an anti-vibration panel.

All welds are done using a robotic TIG process, without cracks and gaps, facilitating washing, cleaning and disinfection operations, to ensure maximum hygiene.

Table with work surface and fixed bottom shelf.

Internal Height	Internal Width	Internal Depth	External Height	External Width	External Depth	Position	Ring Size
